WE DEDICATE

Our 1970 *Afhiscan* To

MR. CHARLES J. MESNIER

In his thirty-seven years as superintendent of the School District of Affton, Mr. Mesnier has exhibited the perceptivity, the vision, and the dedicated and energetic spirit essential to the growth and development of a progressive educational system. Because the greater portion of the district's expansion has taken place under his tutelage, he — more than any other one man — is responsible for what the Affton schools have become. He has, indeed, heeded *the signs of the times*.

It is with pride and humility that we dedicate our yearbook to Mr. Charles J. Mesnier.

. . . *the signs of the times*

This past year has been a period of change and advancement in many facets of our lives. We hope that the 1970 *Afhiscan* will provide you, the students, with many happy memories of this eventful year. To remind you of these times, we have adopted as our theme the zodiac signs — *the signs of the times*.

Student Advisory

The 1969-70 Student Advisory has done much for the betterment of Affton High School. This body helped to institute the free study hall program and was instrumental in the establishment of a new dress code. The group has acted as a Board of Election Commissioners in all Student Council elections. Above all, the Advisory is a direct line of communication between the students and the administration in solving school-wide student problems.

Affton

The Varsity Cougars, coached by Irv Kappler and Art Hill, concluded their season with a 1-6-2 record. Although the win-loss column does not show it, Affton had a well-rounded football team this year. For the senior BAGUBAS, this season was a particular contrast to their former years of football. With the many dismal spots, there were a few bright ones. The biggest triumph was the victory over Lutheran South — the milestone for the 1969 Cougars.

C.O.E.

The Cooperative Occupational Education Program (C.O.E.) is a combined effort of the school, business, and industry to provide on-the-job training for youth in occupational areas of their choice. It affords an excellent opportunity for a student to complete high school and get practical work experience at the same time. The C.O.E. student attends regular classes in the morning and then goes to his "training station." He receives school credit on the basis of satisfactory progress both on the job and in a related study course at school.

About that tough course you fought all semester...

Will you need it tomorrow?

It's a simple fact that today's "blue sky" theories are the commonplace working tools of tomorrow. So you can never predict just what knowledge you'll "need" next.

When we say that, it's not just idle advice. We face the situation every day in our business. That's one reason we continually sponsor grants for scientific research to schools and colleges. Some of the projects seem pretty "far out." But in the past, "far out" ideas have helped us make important new discoveries in nutrition, medicine and pharmaceuticals.

So don't worry. That tough course may turn out to be the *easiest* way to a good life for you.
